Grant given by Fondo Nacional para la Cultura y las Artes (FONCA) Research Project:
The Rite, The Myth And The Immediate Future, México, DF., 1996

Artist statement

On May, 2015...

As a part of an investigation based in Photography, I am interesting in exploring social and anthropological topics through Painting, as a traditional technique, as well as through Multimedia techniques. The artwork altogether, invites the audience to reflect surrounded by an environmental concept, intended to depict the realm of the images that we experience on a daily basis.

On March, 2005...

To me a work of art is philosophical in its roots -it encodes the essence and thoughts, in their purest form, of those who bring it to life. My painting talks about a renaissance, where man once again becomes the center of all reflection and metaphor. /By capturing the ephemeral images in our high-definition era, my work transports us to an environment that is purely human yet is governed by technology.
